

SEMINAR

Financial Risk: To hedge or not to hedge

Presented by: **Antoine Lajoie**
President, FINMETRIX Inc.

Thursday, November 23rd 2017
12:15 pm

Room 126, FDA Building, 3450 University Street
McGill University

Refreshments will be served

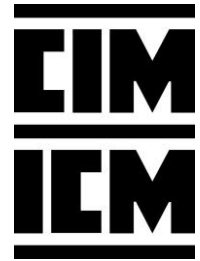

Abstract:

The mining industry has often been criticized for its approach to hedging financial risk. This presentation tackles the subject from multiple angles and considers the impact on various stakeholders. The objective is to help companies develop a forward-looking and transparent methodology to find a balance between long-term survival and market opportunities.

Speaker's Bio:

Antoine holds both a Master's in Finance and a CFA (Chartered Financial Analyst) and has 20 years of experience in financial risk management and derivatives. He began his career in the Treasury of the National Bank of Canada as a strategist to Canadian companies (SMEs and large businesses). Antoine tailored unique strategies to help them manage their financial risk (foreign exchange, interest rate and commodities). The expertise gained during his career at the National Bank helped him understand the reality of thousands of companies of different sizes and from different industries. Subsequently appointed head of the foreign exchange and derivatives team as Managing Director, he leads a team of over 25 financial risk management consultants. At FINMETRIX, Antoine now has the independence to truly partner with his clients and to properly manage their financial risks related to currencies, interest rate and commodities. Clients include: manufacturers (auto, aeronautic, telecom, construction, etc.); importers/distributors of sporting goods and clothing; law firms; and accounting firms and their clients

**RSVP by 12:00 pm Tuesday November 21st to Lise Chartrand, Secretary, CIM Montreal
Branch at lizon1@videotron.ca or Tel. (514) 425-5553**
